

# VOTE SOL

KPA VICE - PRESIDENT

"Here's what I'll do..."

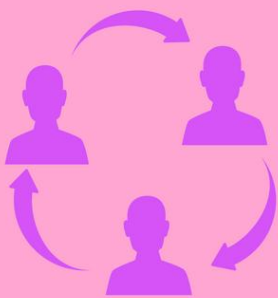

As the university seeks to expand PG and distance learning PG numbers I'll ask for more funding to reach these new students.

Distance learning PG and modular PG students are often hard to reach. I'll develop a new social media strategy and look into upgrading our website.

I have fought for value-for-money and raised awareness around fee increase. I'll demand a robust and consistent review of masters quality.

The KPA has made great strides in inclusivity but it can't stop. We must continue to shake the image of our association as an old boys club

Longterm mental and physical health issues do not disappear when students start PG courses. I'll work with KPA, SU and University to improve how we care for PG students health.

The KPA is one of three associations nationally. I would work nationally to co-ordinate action at NUS and in other national arenas with an aim to shape PG funding policy.
